

Ana Julia Rodriguez
Creative Computing
Final Project

For my final project for creative computing im going to create an interactive story Processing 2.

These story it going to be about Ali and Nina. They were both walking in the streets of Paris and they bump into a really cute bakery with cakes, muffins, cupcakes and shakes. Ali offers Nina something to eat but she is on a diet.

When Nina passes in front of a bakery she reconsiders getting something from this really cute and typical Paris place but she ends up eating too much so she gets immediately fat and cries.

The illustrations on the story are going to be bright, sharp and colorful.

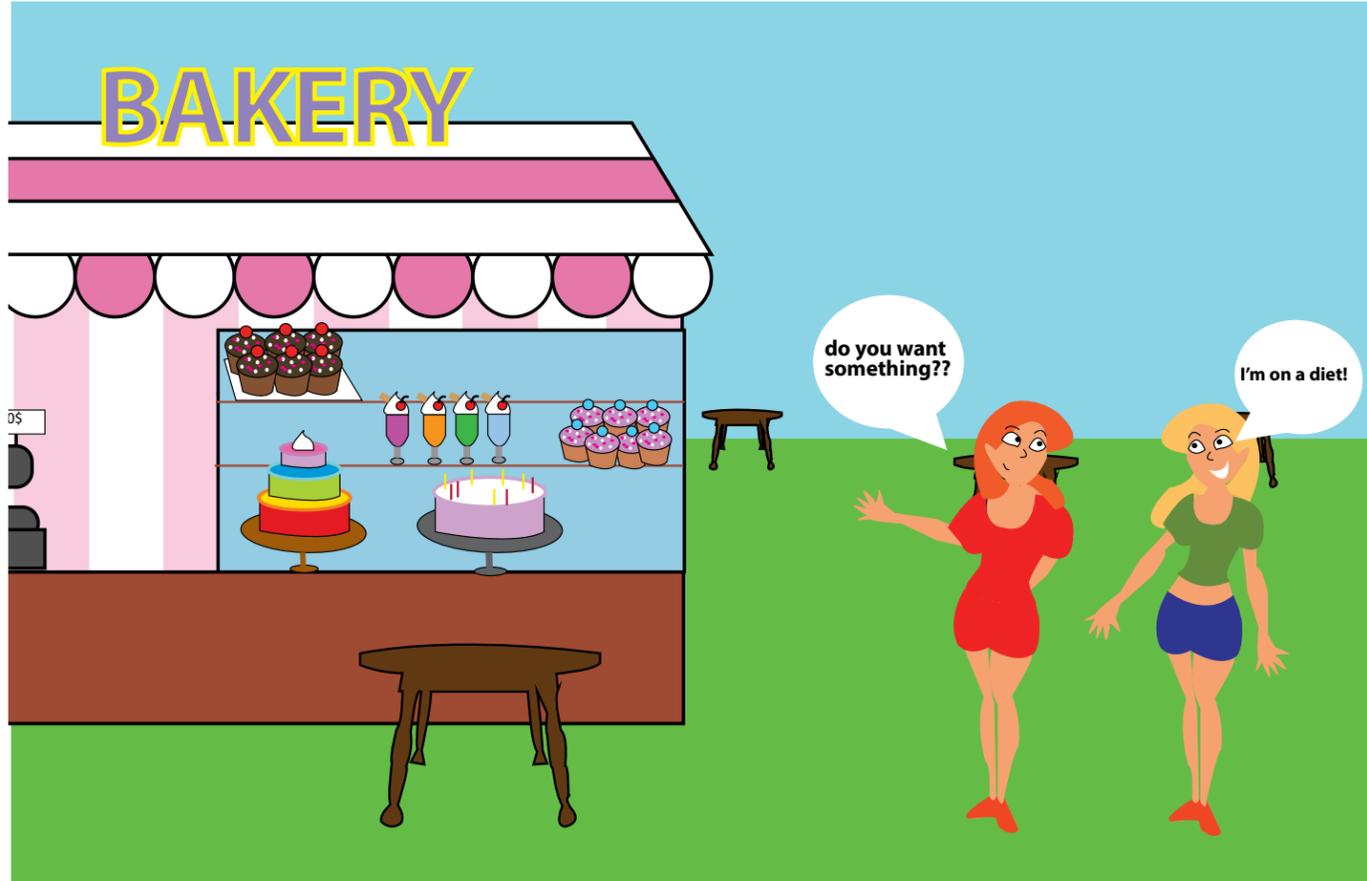

Scene 1: Two girls walking in the street, they see a colorful and pretty bakery. One of the girls offers something to eat from the bakery to the other. She refuses because she is on a diet.

Scene 2: When Nina walks in to the bakery she watches every cake, cupcake

Storyboards and Mockups:

Scene 1:

Mockup:

Storyboard Scene 1:

1- When you click in any part of the window two girls begin to walk towards the bakery and then they stop a few steps a side.

2- If you click again a talking bubble will appear on top of the girl on the left and it will say "do you want something?". At the same time her hand is going to point the bakery.

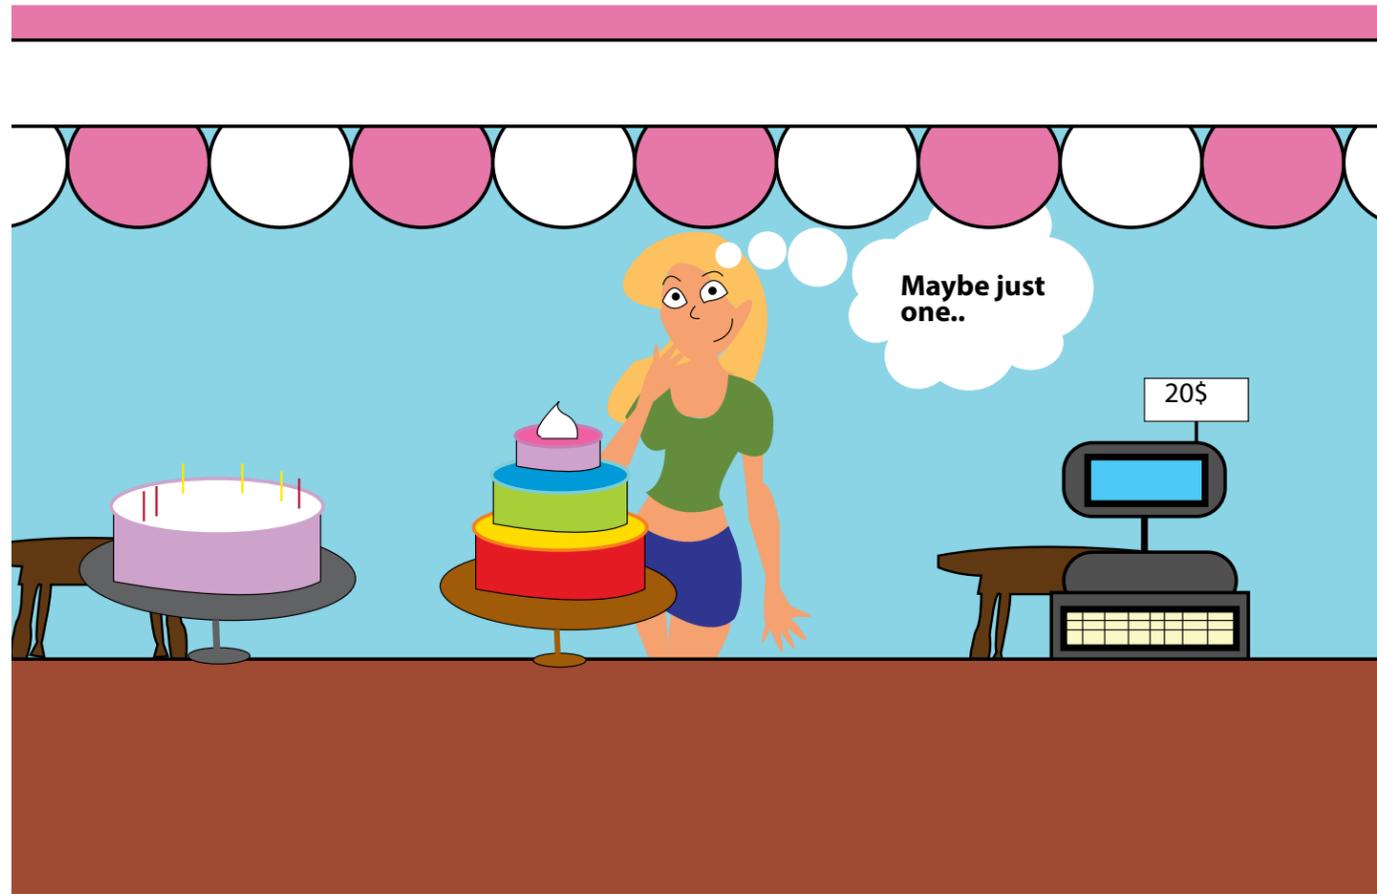

3- When you click for the third time another talking bubble will appear, this time on top of the girl on the right and it will say "I'm on a diet".

Storyboards and Mockups:

Scene 2:

Mockup:

Storyboard Scene 2:

1- When you click again in the window the girl walks into the bakery.

2- If you click again she checks all the cupcakes and and cakes and puts her hand in her mouth (like wondering).

3- When you click for the third time another talking bubble will appear saying "Maybe just one".

Storyboards and Mockups:

Scene 3:

Mockup:

Storyboard Scene 3:

1- When you click the girl grabs the cakes.

2- If you click again she eats them all at once.

3- When you click for the third time she gets fat and starts to cry.
